

S9700 Sleep Therapy System

Non-invasive ventilator

Friendly Powerful Reliable

Application

The Bipap System makes a good performance in sleep center, home and other departments. From high to low acuity, simple to complex cases, adult to geriatric patients, Rooe Medical Bipap System offers you the choices you need in ventilation, monitoring and technique.

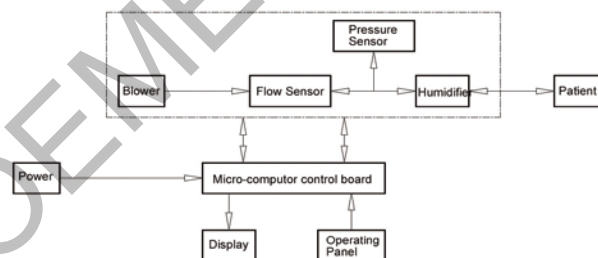

Features and trust points

- 3.5 inch LCD screen displays the ventilation parameters and alarm information.
- Multiple working modes: CPAP, S adapt to wide range patient. Multiple working modes: CPAP, S adapt to wide range patient. Integration breathing circuit design ensures easy operating and keeps tidy.
- Shutting down is not required while refilling water. Shutting down is not required while refilling water.
- Over 10000 units are installed in the world every year. Over 10000 units are installed in the world every year. Designed and manufactured by Rooe Medical with over 23 years of experience in medical field.
- Simplicity: Portable and friendly use.

Suitable patients

- Simple obesity causes respiratory tract (nose and throat) stenosis snorers.
- Chronic rhinitis, pharyngitis, turbinate hypertrophy, septum bends, tongue root hypertrophy, uvula hypertrophy, tonsil hypertrophy, pharynx hypertrophy cause upper respiratory tract stenosis snorers.
- Congenital short jaw snorers (small chin) lead to the upper respiratory tract stenosis.
- All snoring (snoring) accompanied by sleep apnea, suffocation, stopped breathing, low ventilation, oxygen, and low blood oxygen content.
- All patients who get medical monitoring and diagnosis that suffering from slight to severe obstructive sleep apnea syndrome.

Working principle

- Blower can adjust the demanded pressure gas according to need, transfers the gas to patients through humidifier.
- Control panel processes the setting parameters, pressure and flow of respiratory and other data stated by panel operation, shows the control value and monitoring value on the display.
- According to the alarm parameter value stated by panel, the control panel can report the alarm by sound and light when the monitoring parameter exceeds the setting parameter.

Structure of product

1. Press button (modify the working parameter and control the working status)
2. Display screen (display system setting, monitoring parameter, waveform, alarm, etc.)
3. Inspiratory port (connect 1.8m breathing pipe), display the water level of humidifier
4. Humidifier
5. DC power port (connect 24V DC power)
6. Filter control and air inlet
7. Label of equipment
8. Cap of the humidifier

Cherish your life, Cherish your health!

S9700 Sleep Therapy System

Non-invasive ventilator

Specifications

Ventilation modes	CPAP, S
CPAP	Adjusting range: 4cmH ₂ O-20cmH ₂ O
Ramp time	Increment: 0.5cmH ₂ O Adjusting range: 0-60min
Flex	Increment: 1min Adjusting range: OFF, 1-3
Humidifier	Increment: 1 Adjusting range: 0-5
Ppeak	Increment: 1 0-30cmH ₂ O

Working conditions	
Environmental temperature	5 C -35 C
Relative humidity	15%-95%
Atmosphere pressure	830hPa-1060hPa

Oscillograph display	Airway pressure histogram
-----------------------------	---------------------------

Alarm and protection	
High airway pressure	10cmH ₂ O-20cmH ₂ O
Suffocation warning	8s-12s no spontaneous ventilation
Pipe detached	Pipe detached 16s

Using conditions	
Storage conditions	-20 C -+60 C
Relative humidity	15%-95%
Atmosphere pressure	500hPa-1060hPa

Packing size	
Carton packing size	L 285*W 350*H 290mm
G.W.	4.5KG
N.W.	3.5KG

Original part

3.5 inch screen

Humidifier

Breathing tube

Mask

Bag
